

## **Husky Lima Refinery**

### Turnaround Scoping Coordinator

Job No. 00120625-20180324

- The Turnaround Scoping Coordinator is primarily responsible for developing and maintaining the Turnaround Scope. This role will proactively gather and compile information from Refinery Inspection, Operations, Maintenance, Reliability Engineering, Project Engineering, Technical Support, Instrument and Electrical, and Rotating Equipment groups to produce a comprehensive Turnaround worklist and plan. The position is responsible for maintaining security and accuracy of the worklist and maintaining the AWR process after scope freeze.

#### **Specific responsibilities will include:**

- Leads scope development process by integrating information from PSM, Environmental, refinery Inspection, Operations, Maintenance, Reliability Engineering, Project Engineering, Technical Support, Instrument, Electrical and Rotating Equipment.
- Responsible for initiating the worklists, assigning individual line item numbers, and providing routine updates.
- Acts as a liaison between turnaround and operations groups to ensure the Turnaround worklists are all-inclusive and contain scope that can only be done during Turnarounds.
- Leads scope review meetings to ensure all parties understand the scope and responsibilities.
- Ensures and coordinates operation's development of blanklists as needed for all worklist line items.
- Determines scaffold and fresh air requirements. Considers whether equipment will need special preparation.
- Develops workbook for operators and supervisors which includes information about Turnaround items on their unit. Includes safety, MSDS, timing, shutdown & startup procedures, and special procedures.
- Owns and maintains the Turnaround Additional Work Request (AWR) Process, ensuring all work that is added after scope freeze is identified and estimated prior to inclusion in the Turnaround scope

## Qualifications

- Experience with producing and/or reading engineering drawings such as plot plans, piping isometrics, instrument loop drawings, and P&ID's.
- Interpersonal communication and organizational skills.
- Proactive mindset to deliver Turnaround scope and planning
- Ability to work in a team environment dealing with people from various disciplines to achieve total Turnaround success.
- Minimum of ten years' experience in refinery or chemical plant operations, project coordination or maintenance.
- Demonstrates knowledge and experience with safe work practices in an oil refinery environment.
- Familiarity with SAP and knowledge of IPS is an asset
- Proficient with Primavera Project Planner
- Proficient with MS Excel

## **Husky Lima Refinery**

Manager, Reliability Inspection

Job No. 00045808-20180510

## Description

- Designing, scheduling, executing, evaluating, and documenting inspections for various refinery equipment. This position provides expertise and direction on code compliance and weld procedure qualification to capital projects and maintenance activities involving piping and pressure vessels constructed to various ASME Codes, including quality control of repairs. This position provides leadership for the inspection group consisting of both Husky and Contract employees.

## Specific responsibilities will include:

- Provide leadership and direction to the Mechanical Integrity Team, including Husky & Contract Inspection personnel, establishing strategic direction and ensuring safe, high quality and timely inspection work is completed.
- Develop and implement programs to improve the reliability and safety of fixed equipment.
- Supervise and coordinate inspection, testing, design, alteration and repair of fixed equipment.
- Within the position's established level of authority, develop and manage annual budget to achieve Business Unit objectives.
- Provide Business Unit leadership to effectively manage the Mechanical Integrity Team, maximize team effectiveness, and deliver on performance contracts.
- Ensure talent management and workforce planning activities are aligned with current strategies.
- Coach, develop and train staff, recognizing their expertise and contribution to the work of the Business Unit.
- Oversee the development and implementation of training and career development programs to ensure that they align with operational requirements and Husky's strategic objectives.
- Provide ongoing feedback on performance informally through one on one mentoring and formally through PPRP reviews.
- Provide leadership during Lima's transition to a Risk-Based Inspection Program
- Provide historical and corrosion research, reporting, documentation, and repair recommendations.
- Provide fixed equipment design and repair expertise through research and repair recommendations consistent with applicable industry codes, standards and specifications.
- Responsible for root cause failure analysis of components including corrosion research, reporting, and supervision of metallurgical analysis.

- Develop and publish written reports on inspection findings and failure analysis (includes reviewing and editing inspection recommendations and reports for code and engineering compliance.)
- Keep abreast of the latest developments in Inspection Technology, Damage mechanisms, Industry trends, and issues in the petrochemical industry and apply those external learnings to the Mechanical integrity programs at the Lima Refinery.
- Maintain an efficient and safe work environment that provides leadership that fosters and promotes employees' participation.
- Responsible for following all safety policies and guidelines as established by Husky Energy and the LRC.
- Actively participate in monthly Safety Meetings.
- Participate in HAZOPS, MOC's and Incident Investigations.

### **Qualifications**

- Bachelor's Degree in Engineering preferred; or directly related experience and Inspection Certification may be considered in lieu of degree.
- Professional Certifications would be considered an asset:
- American Petroleum Institute (API) 510 Pressure Vessel Inspector Certificate
- American Petroleum Institute (API) 570 Piping Inspector Certificate
- American Petroleum Institute (API) 653 Tank Inspector Certification
- American Welding Society (AWS) Certified Welding Inspector
- Registered Professional Engineer
- Non-Destructive Evaluation (NDE) Level II Certificate in Penetrant Testing (PT)
- Non-Destructive Evaluation (NDE) Level II Certificate in Radiography Testing (RT)
- Non-Destructive Evaluation (NDE) Level II Certificate in Ultrasonic Testing (UT)
- Non-Destructive Evaluation (NDE) Level II Certificate in Magnetic Particle Testing (MT)
- Minimum of 10 years of experience in the inspection of fixed equipment and piping systems using API-510, API-570, and NBIC

- Minimum of 3 years of Supervisory Experience
- Five years of experience with repairs to ASME pressure vessels, boilers and shell and tube heat exchangers would be an asset
- Ability to isometrically sketch piping systems and understand process flow and P&ID's
- Ability to read and interpret engineering drawings
- Working knowledge of welding and fabrication techniques including heat treatment and material specifications and their applicability in petrochemical plants. (ASME Section IX and NDE requirements.)
- Refinery experience directly related to inspecting piping systems and experience in Refinery Turnaround(s)
- Strong working knowledge of oil and gas industry codes, standards and jurisdictional regulations (ASME, API)
- Proficient with PCMS and MS Office applications
- Proficiency SAP or other Business Enterprise Software would be an asset
- Analytical skills to identify key issues based on relevant data and provide appropriate solutions/recommendations
- Strong planning, scheduling and cost control skills
- Strong interpersonal, team building and communications skills to collaborate with the business unit and leadership team

## **Honda Transmission, Russells Point**

Controls Engineer

Job No. HTM 000081

### **Position Core Role:**

- Provide the Engineering and ES groups with electrical/controls support to maintain daily equipment run rates.
- Support AT New Model group with necessary equipment changes/improvements for new model launches.
- Support the AT Quality group with polk-a-yoke systems to ensure quality and provide countermeasure solutions for concern items.
- Design, assemble, install and commission turnkey automated systems for the AT department BOP projects.

**Essential Function and Responsibilities:**

- Experience with, but not limited to, programming of sequence and safety PLC's, HMI's, Motoman robots, Cognex/Keyence vision systems, servo positioning systems, VFD's, and RFID systems.
- Experience with multiple network platforms and various communication protocols.
- Experience with complete electrical and pneumatic design for automated systems.
- Understand SCCR calculation methods and applicable knowledge of NEC/NFPA and ANSI RIA standards.
- Able to perform all project aspects from electrical systems design/drawings, materials procurement, system wiring/assembly, programming and commissioning.

**Daily Tasks:**

- Project work.
- Support ES with electrical and controls types of issues.
- Help support various AT groups to provide electrical/controls expertise.

**Required Knowledge, Skills and Abilities:**

- Ability to design electrical controls systems including power, safety and controls from concept to finished drawing package.
- Experience with PLC programming utilizing function block and ladder logic techniques.
- Ability to configure control devices (PLC's, robots, vision systems, etc.) and integrate them into complex automated systems.
- Understanding of various communication protocols and network layers from simple I/O up through the enterprise level.
- Experienced at panel and field wiring. Basic understanding of pneumatic components and circuitry.

**Required Experience:**

- Minimum of 2 years manufacturing experience in electrical/controls field and/or 2 years experience in systems integration field.

**Education Requirements:** B.S. in Electrical Engineering or 6 years equivalent experience

### Maintenance/Machine Repair

- Install, troubleshoot, and repair machinery/equipment.
- Two (2) years of multi-trade experience with industrial electrical, mechanical, hydraulics, and pneumatics, and robotics required.
- High school diploma or equivalent and related technical training required.

To apply: [www.aapstmarys.com](http://www.aapstmarys.com)

## **Omni Manufacturing, St. Marys**

### Welder

- Welder to cut and join metals and other materials at our facilities
- Operate appropriate equipment to put together mechanical structures or parts with a great deal of precision.
- Job is important as it provides support to production.
- Must be competent in using potentially dangerous equipment following all safety precautions.
- The ideal candidate will also have a steady hand and great attention to detail. Knowledge of different kinds of metal and their properties is essential.

### **Responsibilities**

- Read blueprints and drawings and take or read measurements to plan layout and procedures
- Determine the appropriate welding equipment or method based on requirements
- Set up components for welding according to specifications (e.g. cut material with powered saws to match measurements)
- Operate angle grinders to prepare the parts that must be welded
- Align components using, fixtures, calipers, rulers etc. and clamp pieces
- Weld components using manual or semi-automatic welding equipment in various positions (vertical, horizontal or overhead)
- Repair machinery and other components by welding pieces and filling gaps
- Test and inspect welded surfaces and structure to discover flaws
- Maintain equipment in a condition that does not compromise safety

**Experience/Certification Required:**

- Proven experience as welder
- Experience using a variety of welding equipment and procedures (GMAW & GTAW.)
- Experience in using electrical or manual tools (saws, squares, calipers etc.)
- Ability to read and interpret technical documents and drawings
- Knowledge of relative safety standards and willingness to use protective clothing (face-shield, gloves etc.)
- Deftness and attention to detail
- Successful completion of a relevant apprenticeship program is required
- Professional Certification (e.g. an AWS welding certificate) will be a plus

**Education Level:** High School

**To apply:** *In person, or mail resume to 901 McKinley Road, PO Box 179, St. Marys, OH 45885*

**Or email resume to:** [hr@omnimfg.com](mailto:hr@omnimfg.com)

## **Omni Manufacturing, St. Marys**

### Painter/Powder Room Technician

- Responsible for powder coating parts to company supplied prints.

#### **ESSENTIAL FUNCTIONS:**

- Adjust oven temperature to accommodate various line speed.
- Set up and checks water chemical balances in a wash system.
- Adjust powder flow and forward air pressures to ensure spec millage and gloss are retained.
- Maintain quality standards and line performances as set forth by Supervisor.
- Responsible for following quality system controls (ISO9001).
- Maintain attendance as required by company policy.
- Work all assigned overtime.
- Maintain housekeeping in his/her work area.

#### **Experience/Certification Required:**

- Good knowledge of coating various types of powders. 3 years Powder Coating experience or 2 year Technical Degree in Powder Coating.
- Forklift license.
- Knowledge of manufacturing environment, measuring device, safety requirements, and quality requirements.

**Education Level:** Associate's Degree

**Career Level:** Experienced

***To apply: In person, or mail resume to 901 McKinley Road, PO Box 179, St. Marys, OH 45885***

***Or email resume to: [hr@omnimfg.com](mailto:hr@omnimfg.com)***

## **Industrial Machining Services, Fort Loramie**

### **Controls/Electrical Engineer**

- 3 – 5 years of experience in design and programming of automated manufacturing cells. Demonstrated programming knowledge of one or more the following control platforms (Allen Bradley, Mitsubishi, Omron) willingness to learn additional due to project needs.
- Demonstrated programming knowledge of one or more of the following robotic platforms (Yaskawa, Fanuc, ABB) with the willingness to learn additional due to project needs.
- Design of control systems, safety systems, and panel layouts to applicable codes and customer specifications.
- Support installations into customer plants as needed.
- Competent in AutoCad 3D and Microsoft Office.
- Overnight travel requirements less than 10%.

#### **Experience/Certification Required:**

- Associate Degree but not necessary if you have the skills needed for this position.

***To apply: Please send email: [hr@ims-spi.com](mailto:hr@ims-spi.com)***
